

GADA TOKEN

WHITEPAPER

The utility token powering the Gada ecosystem of chat, social, streaming and commerce.

GDT | BNB Smart Chain | Version 1.0

gadatoken.com

ABSTRACT

One token across the Gada ecosystem

Gada Token (GDT) is issued on BNB Smart Chain with a fixed supply of 50 billion tokens. It connects messaging, social interaction, streaming and marketplace trade through a transparent, efficient value layer, with planned bank partnerships and future exchange listings.

50,000,000,000	BNB Smart Chain	BEP-20
Total supply	Network	Token standard

Why Gada Token exists

Our mission

To power a trusted digital ecosystem where people can communicate, create, trade and transact using one efficient and transparent token.

Fragmented platforms

Messaging, social, streaming and trade run on separate payment systems.

Costly, slow payments

Cross-border payments carry high fees and delays.

Limited creator rewards

Platforms control monetization and take most of the value.

Crypto apart from banking

Digital assets sit outside the banking system, limiting adoption.

THE GADA ECOSYSTEM

Where GDT is used

gada.chat

A social media platform owned by GADA CHAT LTD. Profiles, communities and shared content, with GDT supporting creator rewards, community participation and user-to-user value transfer.

gadavoice.com

A chat messenger and platform combining private and group communication with a marketplace for goods and services, a streaming system for creators, and community tools. GDT acts as the payment and value layer.

The ecosystem is extensible. New products and integrations will be announced through official channels.

TOKEN OVERVIEW

Gada Token at a glance

Token name	Gada Token
Symbol	GDT
Blockchain	BNB Smart Chain
Standard	BEP-20
Total supply	50,000,000,000
Contract	0x090458b49D6deAA9F7334a5e628aa26D82A3A082
Website	gadatoken.com

TOKEN UTILITY

Five ways GDT is used

1. Payments

Marketplace purchases and services on gadavoice.com and partners.

2. Creator support

Audiences support creators and streamers directly.

3. Community rewards

Rewards for participation and content on both platforms.

4. Value transfer

Fast, low-cost transfers inside and beyond the ecosystem.

5. Financial integrations

Bridge asset for future banking and payment partnerships.

Utilities are released in stages and are live only once announced.

TOKENOMICS

Allocation of 50 billion GDT

Allocation	Share	Purpose
Ecosystem and platform development	**20%**	Building gada.chat, gadavoice.com and future products
Liquidity and exchange listings	**20%**	Market liquidity and listing requirements
Banking and strategic partnerships	**10%**	Integrations and partner programs
Community and rewards	**5%**	User incentives, creator rewards, campaigns
Team and advisors	**15%**	Long-term contribution, subject to vesting
Reserve	**30%**	Operational continuity and future needs

Final percentages, vesting and liquidity lock details to be published before public release.

BANKING AND FINANCIAL PARTNERSHIPS

Bridging blockchain and traditional finance

GDT is set to partner with local and international banks.

On and off ramps

Convert between local currency and GDT through regulated channels.

Payment settlement

Merchants accept GDT and settle in fiat currency.

Cross-border transfers

Lower the cost and time of sending value across countries.

Compliance and trust

Work with regulated institutions for responsible operation.

Partnerships are announced only after agreements are concluded.

TECHNOLOGY AND SECURITY

Built on BNB Smart Chain

BNB Smart Chain

GDT is a BEP-20 token. The network offers fast confirmations, low fees and wide compatibility with wallets, decentralized applications and exchanges.

Security practices

The contract is publicly verifiable on BscScan. An independent audit will be published once completed. Official information appears only on gadatoken.com and verified channels. Never share your private keys or seed phrase.

ROADMAP

Five phases of growth

1 — 2 — 3 — 4 — 5

Community-led updates

EXCHANGE LISTING STRATEGY

Aiming for all top exchanges

1. Build real usage

Active users through gada.chat and gadavoice.com.

2. Be transparent

Verified contract details and clear documentation.

3. Provide liquidity

Adequate liquidity and a healthy holder base.

4. Meet requirements

Satisfy each exchange's compliance and technical review.

Listings depend on each exchange's own approval and are announced only once confirmed.

Know the risks

- **Market volatility**
- **Regulatory change**
- **Technology and smart contract risk**
- **Adoption not guaranteed**
- **Partnership and listing delays**
- **Liquidity risk**

This presentation is for information only. It is not financial, investment, legal or tax advice, nor an offer to sell securities. GDT is a utility token and carries no promise of profit or future value. Statements about plans, partnerships and listings are forward-looking and may change. Do your own research.
